EXPERIENCE

Codibly, Kraków/Remote– Full Stack Software Engineer

03/2024 – Present

- **Lead** a frontend team of **4 developers** for a key project serving a major European automotive client with **hundreds of active users**.
- **Act** as the primary "go-to person" for frontend architecture, responsible for technology selection and design decisions.
- **Develop** and maintain scalable backend services using Java, Spring Boot, PostgreSQL, and Docker hosted within an Azure cloud.
- **Mentor 2 junior developers** and successfully manage the onboarding process for **3 new team members**, ensuring high code quality.
- **Collaborate** with Product Owners to define business and technical requirements.
- **Provide** expert guidance on UI/UX best practices to ensure a consistent and intuitive user experience.
- **Present** developed features directly to project stakeholders, ensuring alignment with client expectations.
- **Support** company growth by conducting technical estimations and feasibility analyses for potential new business opportunities.

GoOnline, Kraków/Remote – React Front-End Developer

04/2023 – 03/2024

- **Engineered** "Seecore," a complex workplace management system for airport environments using React, TypeScript, MobX, and Three.js.
- **Designed** a real-time 3D map interface to track aircraft and devices, significantly improving operational awareness for **20+ daily operators**.
- **Integrated** webview capabilities within a Flutter environment to ensure seamless cross-platform performance on mobile and web.
- **Orchestrated** robust chat functionality and push notifications to enable instant communication across platforms.
- **Optimized** application performance through code refactoring, reducing load times by approximately **20%**.
